Internet Privacy: Technology and Policy Developments

Time: 12:00pm - 2:30pm

Location: Rayburn Room 2044, Capitol Hill, Washington DC

Debates over the Federal Communications Commission's recent intervention in Internet privacy (and the Congressional Review Act resolution that prevented those efforts from taking effect) revealed the need for a better understanding of the technological foundations of privacy. FTC Acting Chairman Maureen Ohlhausen and a distinguished group of technologists will explore the impact of recent technological changes on the ways that personal information is handled and what those changes mean for privacy policy.
