### Energy and Geopolitics in Today's Political Climate

---

Time: 12:00pm - 1:00pm

Location: Silverman 245A

Penn Law National Security Society is hosting this conversation about energy policy and geopolitics in today's political climate. Join us for a conversation with Neil Bhatiya from the Center for a New American Security and Sam Brinton, a nuclear engineer who specializes in nuclear waste management policy. See both bios below.

Neil Bhatiya is the Research Associate for the Energy, Economics, and Security Program at the Center for a New American Security. His work focuses on the geopolitics of energy, climate change, and tools of economic statecraft. Prior to joining CNAS, he was the Climate and Diplomacy Fellow at the Center for Climate and Security. He was previously a Fellow at the Century Foundation. His writing has appeared in Foreign Policy, World Politics Review, Grist, the National Interest, and The Week.

Sam Brinton is a nuclear engineer who specializes in nuclear waste management policy formation, and technical information translation. They have written successful legislation as well as managed high level political relationships ever since graduating with graduate degrees in Nuclear Engineering and Technology Policy from MIT. Sam has also been published in TIME, USA Today, The New York Times, the LA Times, and many others on energy issues as well as LGBTQ politics.
