

PARIS COLLOQUIUM ON CORPORATE GOVERNANCE

The following materials comprise selected portions of the proceedings of the Paris Colloquium on Corporate Governance, held on March 10 and 11, 1983. The Paris Colloquium was organized primarily by the International Faculty for Corporate and Capital Market Law with the assistance of the Conservatoire National des Arts et Métiers, the Institut National des Techniques Economiques et Comptables, and the Université de Haute-Normandie. Members of the International Faculty introduced each session, providing a comparative perspective on the topic at hand. French legal scholars and practitioners followed the members of the International Faculty with presentations on France's experience with corporate governance, particularly in light of the recent nationalizations.

The International Faculty was formed through the efforts of Dean Robert H. Mundheim and Professor Noyes E. Leech of the University of Pennsylvania Law School and its Center for Study of Financial Institutions. In 1974, they recognized the need to establish a living resource to accumulate and make available on a timely basis knowledge and expertise in the areas of corporate and capital market law. Through correspondence and interviews in various countries, they selected the members and associate members of the International Faculty. The members also serve as Advisory Editors to this Journal and are listed inside the front cover. The Paris Colloquium is part of a continuing endeavor by the International Faculty to identify problem areas in corporate and capital market law and develop solutions through the exchange of knowledge and ideas within a comparative perspective.

Colloquium participants reported here are listed at the end of the proceedings.
