Regulating Robo-Advisors Across the Financial Services Industry

Time: 12:00pm - 1:20pm

Location: Silverman 147

Speakers: Tom Baker & Benedict G.C. Dellaert
(Optimizing Government Project)

Featuring:

Tom Baker

William Maul Measey Professor of Law and Health Sciences
University of Pennsylvania

Benedict G.C. Dellaert

Professor
Erasmus School of Economics
Erasmus University Rotterdam

Moderated by:

Richard Berk

Chair, Department of Criminology
Professor of Statistics and Criminology
University of Pennsylvania

Consumers are increasingly turning to automated systems for suggestions about how and where to invest. The proliferation of “robo-advisors” – automated financial advice tools based on machine learning algorithms – points to the potential need for new types of financial services regulation and raises important questions about markets for complex goods and services. More broadly, automated investment products provide a robust case study for exploring the limits and possibilities of consumer protection as automation extends into throughout the marketplace.

This event is a Special Seminar co-sponsored by the Optimizing Government Project and the Penn Program on Regulation.
