As Time Goes By: New Questions About the Statute of Limitations for Rule 10b-5

Jill E. Fisch

University of Pennsylvania Carey Law School
AS TIME GOES BY:* NEW QUESTIONS ABOUT THE STATUTE OF LIMITATIONS FOR RULE 10b-5

JILL E. FISCH**

In this Article, Professor Fisch examines the history and legacy of Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilberston, the controversial 1991 Supreme Court decision that established a federal statute of limitations for private causes of action brought under Rule 10b-5. In Part I, Professor Fisch reviews the history of the 10b-5 statute of limitations prior to Lampf. Part II then analyzes both the issues resolved and questions raised by Lampf. Part III traces the congressional reaction to Lampf that culminated in the addition of section 27A to the Securities Act of 1934. In Part IV, Professor Fisch concludes by analyzing the legitimacy of section 27A and the many issues left unanswered by this statutory response to Lampf.

There are dozens of Supreme Court decisions and perhaps thousands of lower court opinions addressing problems of statutory interpretation that arise in connection with private rights of action under section 10(b)1 of the Securities Exchange Act of 1934 ("1934 Act") and Rule 10b-52 of the Securities and Exchange Commission ("SEC"). The quantity of judicial ink addressed to the problem is not surprising considering that, although courts have implied a private right of action, neither the 1934 Act nor Rule 10b-5 expressly provides such a claim. Accordingly, there is an absence of legislative guidance as to the appropriate parameters of the cause of action. Unlike most statutory claims in which Congress delineates the nature of the claim, those who have standing to pursue it, the proper measure of damages, and the period during which claims must be filed, in the case of federal securities fraud, these questions must be answered by the courts.

The courts claim, as of course they must, that providing these answers does not amount to lawmaking. They explain that they are simply divining congressional intent. The acknowledged "awkward task" of "imagining" congressional intent with respect to "a cause of action it really

This Article was prepared for a lecture presented on April 1, 1993, at the Fordham University School of Law Graduate Colloquium "Happy Birthday 10b-5: 50 Years of Antifraud Regulation." I am grateful to Marc Arkin and Michael Malloy for their comments on earlier drafts and to Jackie Snider, Fordham Law School Class of 1993, for her research assistance.
never knew existed" has created a number of judicial principles with respect to securities fraud that have little origin in the text or history of the statute. The recent struggle to determine the appropriate statute of limitations under Rule 10b-5 is an example of this process. On June 20, 1991, the U.S. Supreme Court decided *Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilbertson*, in which it held for the first time that claims under Rule 10b-5 were subject to a uniform federal statute of limitations. Six months after *Lampf*, Congress responded to the decision with its first legislation addressed to private civil securities fraud claims. The response was an amendment to the 1934 Act that, although it did not change the *Lampf* statute of limitations, precluded its application to pending litigation.

Although the Court's adoption of a uniform federal statute of limitations after forty years of lower court practice to the contrary smacks of judicial legislation, the *Lampf* decision was a welcome end to the uncertainty and forum-shopping created by the prior practice of borrowing from state law. Moreover the ensuing congressional reaction to the decision presents an unusual separation of powers question: does a statute that reverses the retroactive application of a new judicially created statute of limitations infringe upon the province of the courts? Was the congressional response to *Lampf* a reclaiming of the legislative function or a usurpation of the judicial role of statutory interpretation?

The most critical question remains to be answered: what is the future of the statute of limitations for private claims brought under Rule 10b-5? Congress intends to consider the issue further, and legislation has been
introduced to expand the limitations period in future cases. If the mess
generated by this first statute is any indication, we should be wary of
future congressional forays into securities fraud legislation.

I. History of the 10b-5 Statute of Limitations

For nearly four decades, courts struggled with the issue of determining
the applicable statute of limitations for 10b-5 claims. In the absence of
an express statute of limitations for private federal securities fraud
claims, courts followed the rules applicable to other federal claims in
which there was no express federal period; they "borrowed" the statute
of limitations from the most closely analogous state law9 cause of
action.10

Borrowing from state law was not as straightforward as it might ap-
pear. First, there was the question of which state cause of action was
most closely analogous to federal securities fraud.11 While some circuits
chose to borrow from state securities laws or blue sky laws, others looked
to the statute of limitations applicable to common law fraud or misrepre-
sentation.12 Courts then had to determine whether they should borrow
equitable provisions to toll the statute of limitations, such as discovery
periods, equitable tolling doctrines, or delayed accrual due to fraudulent

9. The first appellate court decision to borrow a state law limitations period for a
Rule 10b-5 cause of action was Fischman v. Raytheon Mfg. Co., 188 F.2d 783 (2d Cir.
1951).

10. Courts had concluded that this approach was dictated by the Rules of Decision
Act, 28 U.S.C. § 1652 (1988), which provides that "[t]he laws of the several states, except
where the Constitution or treaties of the United States or Acts of Congress otherwise
require or provide, shall be regarded as rules of decision in civil actions in the courts of
the United States, in cases where they apply." See Lampf, Pleva, Lipkind, Prupis &
Petigrow v. Gilbertson, 111 S. Ct. 2773, 2784 n.2 (Stevens, J., dissenting).

11. Borrowing from state law presented an additional problem in that state law limi-
tations periods were frequently amended. See Short v. Belleville Shoe Mfg. Co., 908 F.2d
1385, 1388-89 (7th Cir. 1990), cert. denied, 111 S. Ct. 2887 (1991) (describing difficulty of
borrowing a period for a claim that accrued in 1977 but was litigated after the 1985
amendment of Illinois' statute of limitations in its blue sky law); see also In re Sioux, Ltd.,
Securities Litigation, 914 F.2d 61, 64 (5th Cir. 1990) (reversing dismissal of claims as
time-barred after Texas amended its statute of limitations for common law fraud from
two years to four years).

12. See Short, 908 F.2d at 1388 ("Some [courts] borrow from the statute generally
applicable to fraud; some borrow from state blue sky laws; some courts use a little of each
.... "). These were not the only state law sources used. Some courts borrowed from
state personal injury law. See Maggio v. Gerard Freezer & Ice Co., 824 F.2d 123, 127
(1st Cir. 1987). Others applied the limitations period provided by general catchall provi-
542 (1st Cir. 1978); see also Ceres Partners v. Gel Assoc., 918 F.2d 349, 354-55 (2d Cir.
1990) (citing cases taking borrowing from common law fraud, blue sky laws, personal
injury, and general catchall statutes of limitations); Lyman Johnson, Securities Fraud and
the Mirage of Repose, 1992 Wis. L. Rev. 607, 608-09 n.2 (1992) (citing cases borrowing
from blue sky laws versus common law fraud); Thomas Stewart, Note, One Statute. One
Statute of Limitations; At Last Uniformity for Section 10(b) Claims, 60 U. Cin. L. Rev.
533, 557 n. 197 (1991) (same).
concealment. The adoption of these doctrines in some circuits gave rise, in turn, to further questions: for example, if the statute does not begin to run until discovery, is it activated when plaintiff knows of the claim or when plaintiff should have known?

Furthermore, since the answer to these questions varied from state to state, courts had to undertake a choice-of-law analysis to determine both which circuit’s legal doctrine and which state’s limitations law to apply. Because federal securities fraud, by definition, requires that the transaction at issue involve interstate commerce, courts could arguably apply at least two state statutes to any claim. In securities fraud class actions, this meant that courts could conceivably be called upon to apply dozens of different limitations periods in a single lawsuit.

The variety of answers to these questions meant that both the statute of limitations for federal securities fraud and the manner in which it was applied differed from state to state and from case to case. This gave plaintiffs an unparalleled ability to forum shop. This was particularly true because of the liberal venue provisions of the federal securities laws coupled with the national character of many securities transactions. A securities fraud class action based on transactions in stock listed on a national exchange, for example, could generally be brought in virtually any state.

13. See Short, 908 F.2d at 1387 (describing circuit’s practice of adding to the borrowed limitations period “an overlay of tolling principles from state and federal law”). For a detailed examination of the principles of equitable tolling and fraudulent concealment as applied to federal securities fraud, see Johnson, supra note 12.

14. Courts generally agreed that questions about the application of the statute of limitations were governed by federal law so that, for example, federal law governed application of the discovery rule. See, e.g., Corwin v. Marney, Orton Investments, 843 F.2d 194, 198 (5th Cir.), cert. denied, 488 U.S. 924 (1988):

Although the federal securities laws borrow statutes of limitations from state law, federal law determines when the limitations periods begin to run. It is federal law that imposes the discovery rule, and thus federal law should determine what circumstances and information should alert the suspicions of a reasonably diligent investor.

15. This combination resulted in the application of varied limitations periods for securities fraud even within a single circuit, depending on the state law applicable to any particular claim. Thus, for example, the First Circuit had applied two, three, and six year limitations periods in recent cases, depending on whether it was borrowing from the Maine two-year statute of limitations, the Massachusetts three-year statute, or the Rhode Island six-year statute. See Ceres Partners, 918 F.2d 349, 354-55 (describing varied limitations periods applied in First, Second, Fourth, Sixth, Seventh, and Ninth Circuits).

17. The plaintiff’s ability to choose a forum state required courts frequently to address a choice of law question as well. Because of the broad jurisdiction and venue provisions of the federal securities laws, courts then faced the additional question of whether the
Dissatisfaction\textsuperscript{18} with the logistics of borrowing securities fraud limitations periods from state law did not directly cause the courts to reconsider the practice. Rather, the validity of the borrowing approach was called into question by a series of Supreme Court decisions outside the securities area holding that, in appropriate cases, it was preferable to look to federal law as the source of limitations period when the federal statute in question was silent.

In \textit{DelCostello v. International Brotherhood of Teamsters},\textsuperscript{19} the Supreme Court was called upon to determine the statute of limitations for two claims filed by employees under a federal labor statute that contained no statute of limitations provision. The employees' claims had been dismissed by lower courts that had borrowed the limitations period from state law. The Court held that this borrowing was not appropriate. First, the Court concluded that the state borrowing rule was not compelled by the Rules of Decision Act. Because the Act only compelled application of state law in the absence of federal law, if federal law was found to furnish an appropriate statute of limitations, the Act would not apply.\textsuperscript{20}

Second, the Supreme Court stated that state law does not always furnish an appropriate limitations period, particularly when that period conflicts with the objectives of the federal statute. As the Court explained it, "\textit{[s]tate legislatures do not devise their limitations periods with national interests in mind, and it is the duty of the federal courts to assure that the importation of state law will not frustrate or interfere with the implementation of national policies.}\textsuperscript{21} Accordingly, the Court held that if a limitations period "from elsewhere in federal law clearly provides a closer analogy than available state statutes, and when the federal policies at stake and the practicalities of litigation make that rule a significantly more appropriate vehicle for interstitial lawmaking,"\textsuperscript{22} the federal courts should borrow the federally prescribed period rather than looking to state law.

The Court continued the approach adopted in \textit{DelCostello} in \textit{Agency Holding Corp. v. Malley-Duff \& Associates, Inc.}\textsuperscript{23} \textit{Agency Holding} concerned a civil claim under the federal Racketeer Influenced and Corrupt Organization Statute\textsuperscript{24} ("RICO"). Although RICO contains an express

\textsuperscript{20} See id. at 159 n.13.

\textsuperscript{21} \textit{Id}. at 161 (quoting \textit{Occidental Life Ins. Co. v. EEOC}, 432 U.S. 355, 367 (1977)).

\textsuperscript{22} \textit{Id}. at 171-72.

\textsuperscript{23} 483 U.S. 143 (1987).

private right of action, it does not provide a statute of limitations. The prior practice under RICO, as under Rule 10b-5, had been to borrow a statute of limitations from state law. In Agency Holding, the trial court had determined that the plaintiff's claim was time barred under Pennsylvania's statute of limitations for fraud claims. The Third Circuit reversed, finding that, although Pennsylvania law furnished the appropriate source of a limitations period for RICO claims, the more appropriate period was that of the longer Pennsylvania residual statute of limitations.

The Supreme Court held that, as in DelCostello, state law did not provide an appropriate limitations period because the state law sources were not sufficiently analogous to the type of federal claim provided under RICO. Moreover, the interstate nature of racketeering militated in favor of a uniform federal limitations period. In looking for a federal borrowing source, the Court noted that RICO had been modeled, in large part, on the Clayton Antitrust Act. Accordingly, the Court concluded that the objectives of the RICO statutory scheme would best be served by applying the four year limitations period of the Clayton Act.

The DelCostello and Agency Holding decisions, coupled with the pre-existing inconsistency among the circuits with respect to the appropriate state source for borrowing a limitations period, led several courts to reconsider the validity of their borrowing practices with respect to 10b-5 claims. In In re Data Access Systems Securities Litigation, the Third Circuit, sitting en banc, was asked to decide whether 10b-5 claims in New Jersey should be governed by New Jersey's six year limitations period for common law fraud or the two year period provided by New Jersey blue sky laws.

Rejecting both these options, the court determined that state law did not properly address the regulatory objectives of the federal securities laws. In the court's view, Congress had expressly rejected the approach of both common law fraud and the state blue sky laws when, in 1934, it adopted the Securities Exchange Act. Moreover, the nature of securities fraud litigation required, according to the court, a uniform federal limitations period. The court also noted that most federal securities

28. See id. at 150.
30. See id. at 156.
32. See id. at 1538. The district court certified the question to the Third Circuit pursuant to 28 U.S.C. § 1292(b), which permits certification for appellate review of a "controlling question of law as to which there is substantial ground for difference of opinion." Data Access, 843 F.2d at 1551 n.1 (Seitz, J., dissenting).
33. See Data Access, 843 F.2d at 1547-49.
34. See id. at 1548-49.
35. See id. at 1549.
claims were already subject to a uniform statute of limitations: a one-and-three year limitations period. Accordingly, the court adopted this period for 10b-5 claims. Under the *Data Access* approach, a 10b-5 claim was timely if it was filed within "one year after the plaintiff discovers the facts constituting the violation, and in no event more than three years after such violation."

In *Short v. Belleville Shoe Manufacturing Co.*, the Seventh Circuit also chose to use a uniform federal limitations period for securities fraud claims. Seizing upon the holdings in *Agency Holding* and *DelCostello* that the Rules of Decision Act does not require federal courts to borrow limitations periods from state law, Judge Easterbrook's opinion concluded that "[t]hese cases call for fresh examination of the question whether to turn to state law in securities cases." Citing numerous policy justifications, including the interstate nature of federal securities fraud, the impracticalities of inconsistent rules in different circuits, the opportunities for forum-shopping, and the abundant federal limitations periods available in other sections of the federal securities laws, the Seventh Circuit overturned its previous rule and held that "federal and not state law supplies the statute of limitations in suits under § 10(b) and Rule 10b-5." The *Short* court then examined federal law and concluded that the most closely analogous federal limitations period was the one-and-three year period contained in section 13 of the Securities Act of 1933. Accordingly, the court applied that period to bar the plaintiff's claims.

The Second Circuit followed these examples in *Ceres Partners v. Gel Associates*. In *Ceres Partners*, the court acknowledged that its state law borrowing practices would, under the facts of this case, require it to borrow from the Third Circuit, which had adopted a one-and-three year...
limitations period. Both parties, however, pressed the court to adopt a uniform federal rule. After considering both the practical problems of state borrowing and the legislative purpose of federal regulation, the court agreed that a federal limitations period was appropriate and held that the most closely analogous period was the one-and-three year period provided in sections 9(e) and 18(a) of the Exchange Act.

The decisions in Data Access, Short, and Ceres Partners to adopt a uniform federal statute of limitations created a conflict among the circuits. Although three circuits adopted uniform limitations periods, the other circuits refused to follow their example and reaffirmed their intentions to look to state law. It is not clear, however, that this reflected a deep or permanent split among the circuits. The disagreement between courts can better be described as the middle stage of an evolutionary process.

Both in the circuits that followed the reasoning in Data Access and in those that did not, there were indications that the progression of Supreme Court and circuit cases addressing the subject was causing

44. See id. at 352-53. The Second Circuit borrowing rule required the court to look to the choice of law rules of New York CPLR § 202, which directed application of the laws of the state where the action accrued. In § 10(b) cases, this had been construed by courts in the Second Circuit to mean the state where the “economic impact [of the fraud] is felt, normally the plaintiff’s residence.” Ceres Partners, 918 F.2d at 353 (citations omitted). Because Ceres was a citizen of New Jersey, this rule would have resulted in the application of the statute of limitations used by federal district courts in New Jersey which meant, at the time of Ceres Partners, following Data Access. See id.

46. See Ceres Partners, 918 F.2d at 364.

47. See Nesbit v. McNeil, 896 F.2d 380, 384-85 (9th Cir. 1990); Smith v. Duff & Phelps, Inc., 891 F.2d 1567, 1569-70 (11th Cir. 1990); Jensen v. Snellings, 841 F.2d 600, 606-07 (5th Cir. 1988). In each of these cases, the courts chose to continue their former practice of looking to analogous state law for a statute of limitations in Rule 10b-5 actions.

48. Part of the problem is that the Supreme Court’s instructions have not been clear. After DelCostello, the Court appeared to retreat from its position favoring federal limitations periods for federal causes of action. In Wilson v. Garcia, 471 U.S. 261 (1985), the Court rejected the need for a uniform federal limitations period for private civil rights actions brought under § 1983 and decided that a single limitations period should be chosen for such actions within each state. See Garcia, 471 U.S. at 275. Similarly, after Agency Holding, the Court decided Reed v. United Transportation Union, 488 U.S. 319 (1989), in which it borrowed the limitations period for a labor law claim from state law and reiterated that

the general rule [is] that statutes of limitation are to be borrowed from state law. We decline to borrow a state statute of limitations only “when a rule from elsewhere in federal law clearly provides a closer analogy than available state statutes, and when the federal policies at stake and the practicalities of litigation make that rule a significantly more appropriate vehicle for interstitial lawmaker.”

Id. at 324 (quoting DelCostello v. International Bhd. of Teamsters, 462 U.S. 151, 172 (1983)).
courts to reevaluate their prior practice of "turning to state periods of limitations . . . on auto-pilot." For example, the Seventh Circuit had initially refused to change its practice of borrowing from state law after the Supreme Court decided DelCostello, but then reconsidered in Short after the Court had ruled in Agency Holding. Similarly, although the First Circuit rejected a request to adopt a federal limitations period for securities fraud in a 1987 decision, the following year it looked to federal law for the source of a statute of limitations for a federal labor law claim and, in the course of that opinion, cited Data Access with approval. Moreover, in at least two of the panel opinions in which circuit courts had rejected a federal limitations period, the courts indicated their reluctance to change prior circuit practice in the absence of en banc consideration.

Although the Supreme Court initially refused to hear the question, it eventually granted certiorari to consider the appropriate statute of limitations for federal securities fraud.

II. THE LAMPF DECISION

In Lampf, Pleva, Lipkind, Frupis & Petigrow v. Gilbertson, the Supreme Court addressed the proper statute of limitations for private claims under Rule 10b-5. After reviewing the recent decisions in which lower courts had debated the merits of borrowing from state law, the Court rendered a decision that greatly simplified federal securities fraud litigation. The Court held that a uniform statute of limitations was appropriate for 10b-5 claims and that the limitations period should be borrowed from a federal source.

The Court explained that other provisions of the 1934 Act were more closely analogous to section 10(b) and Rule 10b-5 than state law. After considering several statutes of limitations provided by other sections of the Act, the Court concluded that section 9(e), which applies a one-and-three year limitations period to suits relating to manipulation of security
prices, provided the best fit and should be the source from which the
limitations period for Rule 10b-5 claims is borrowed.\textsuperscript{59} It held that
"[l]itigation instituted pursuant to § 10(b) and Rule 10b-5 therefore must
be commenced within one year after the discovery of the facts constitut-
ing the violation and within three years after such violation."\textsuperscript{60}

The majority opinion did not explicitly address what became the most
controversial aspect of the \textit{Lampf} decision: the question of whether to
apply the uniform federal statute of limitations retroactively to pending
private claims brought under Rule 10b-5. Previously, in \textit{Chevron Oil Co.
v. Huson},\textsuperscript{61} the Court had developed a framework for analyzing whether
decisions should apply retroactively and had applied that framework
when it announced a new statute of limitations. Nonetheless, in \textit{Lampf},
the issue did not merit even a footnote in the majority opinion. The
Court simply concluded that, in light of the undisputed fact that none of
plaintiffs' claims was filed within three years after petitioner's alleged
misrepresentations, the claims were untimely under the three year statute
of repose.\textsuperscript{62} It therefore reversed the judgment of the Court of Appeals.\textsuperscript{63}

\textit{Lampf} generated four additional opinions.\textsuperscript{64} Justices Stevens, in a dis-
senting opinion in which Justice Souter joined, disagreed with the major-
ity's decision to adopt a uniform federal statute of limitations.\textsuperscript{65}
Believing that this approach, while justified on policy grounds, was more
appropriately left to Congress, Justice Stevens argued that the Court
should defer to four decades of established law and continue to borrow
from state law. In a dissent in which Justice O'Connor joined, Justice
Kennedy argued that, although adoption of a uniform federal limitations
period was appropriate, it should not include a three year statute of
repose.\textsuperscript{66}

Justice O'Connor also dissented separately to emphasize her disagree-
ment with the Court's decision to apply its holding to the parties before

\textsuperscript{59} See id. at 2781.
\textsuperscript{60} Id. at 2782. The Court also considered whether the limitations period, specifically
the three year statute of repose, was subject to the doctrine of equitable tolling. See id. It
concluded that this doctrine was fundamentally inconsistent with the one-and-three year
limitations structure. See id. The purpose of the three year statute of repose, according
to the Court, was to impose an outside limit on claims. This limit would be eviscerated if
equitable tolling was permitted. See id.
\textsuperscript{61} 404 U.S. 97 (1971).
\textsuperscript{62} See \textit{Lampf}, 111 S. Ct. at 2782.
\textsuperscript{63} See id. at 2783.
\textsuperscript{64} In addition to the opinions discussed below, Justice Scalia, who joined in most of
the majority opinion, wrote a separate opinion questioning the methodology of judicially
created limitations periods, particularly for judicially created causes of action. Justice
Scalia described the process of implying a statute of limitations for an implied cause of
action as "too lawless to be imagined" but concluded that when confronted with the
situation, the most responsible approach was to borrow from an analogous federal cause
of action. See id. (Scalia, J., concurring in part and concurring in the judgment).
\textsuperscript{65} See id. (Stevens, J., dissenting).
\textsuperscript{66} See id. at 2788 (Kennedy, J., dissenting).
"Until today, however," Justice O'Connor wrote, "the Court has never applied a new limitations period retroactively to the very case in which it announced the new rule so as to bar an action that was timely under binding Circuit precedent." Justice O'Connor was not alone in questioning the retroactive application of the new statute of limitations. Although courts and commentators praised the adoption of a uniform federal statute of limitations, many could not quite believe that the Court intended its **Lampf** holding to be retroactive. The losing plaintiffs in **Lampf** felt the issue was sufficiently ambiguous to file a petition for rehearing on the issue of retroactivity. That petition was denied.

The Court clarified its intent that the holding in **Lampf** be applied to all pending actions under Rule 10b-5 in two other rulings. First, on the same day that it announced its decision in **Lampf**, the Court decided **James B. Beam Distilling Co. v. Georgia**. In **James Beam**, the Court held that the doctrine of selective prospectivity, which the Court had previously "abandoned in the criminal context," was also inappropriate in the civil context. Although a new civil holding could be applied retroactively or prospectively, the Court stated that, "when the Court has applied a rule of law to the litigants in one case it must do so with respect to all others not barred by procedural requirements or res judicata." The implication of this holding for **Lampf** was that, having applied the federal limitations period to the litigants in that case, the Court expected the period to be applied retroactively to other pending cases.

---

67. See id. at 2785 (O'Connor, J., dissenting).
68. Id. at 2786 (O'Connor, J., dissenting).
71. Id. at 2444-45 (citing Griffith v. Kentucky, 479 U.S. 314, 328 (1987)).
72. See id. at 2446. Selective prospectivity involves a court applying its holding to the litigants in the case before it, but declining to make the holding otherwise retroactive. See id. at 2444.
73. See id. at 2447-48. The Court had previously announced a test to determine whether a new rule of law should be applied retroactively or prospectively in **Chevron Oil Co. v. Huson**, 404 U.S. 97 (1971). The **Chevron Oil** test required a court to apply its decision prospectively where its decision involved a new rule of law, where the litigants may have reasonably relied upon the old rule, and "where prospectivity is on balance warranted by its effect on the operation of the new rule and by the inequities that might otherwise result from retroactive application." **James Beam**, 111 S. Ct. at 2445 (citing **Chevron Oil**, 404 U.S. at 106-07). In **James Beam**, the Court seemed to retreat from its holding in **Chevron Oil**, stating that retroactivity should be the norm in civil cases based on principles of equality and fairness. See id. at 2446. The Court refused, however, to "speculate as to the bounds or propriety of pure prospectivity." Id. at 2448.
74. Id.
The Supreme Court gave further evidence of its intention that Lampf be applied retroactively through its action in Welch v. Cadre Capital,76 Welch, which was pending at the time the Court decided Lampf, originally involved the question of whether the Second Circuit would apply its holding in Ceres Partners retroactively. Although the Second Circuit had adopted a federal limitations period in Ceres Partners, it refused to apply that holding in Welch.77 Instead, the court applied the three-part analysis of Chevron Oil78 and concluded that the Ceres Partners holding would not be applied retroactively, based on the facts of the Welch case.79 The Supreme Court granted certiorari in Welch, vacated the judgment, and remanded the case for reconsideration in light of James Beam and Lampf.80 Upon remand, the Second Circuit concluded that Lampf applied retroactively.81 Other circuits have unanimously agreed.82

III. THE RESPONSE AND REACTION TO LAMPF

The immediate response to Lampf was one of shock and dismay.83 Because many of the previously applicable state statutes of limitations either were longer or did not contain a statute of repose, and because courts had also been using equitable tolling principles to delay the running of limitations periods, the retroactive application of Lampf meant that a number of lawsuits that were timely when filed were now time-barred.84 Lower courts were virtually unanimous in concluding that the combination of the decisions in Lampf and James Beam required such suits to be dismissed.85

77. See id. at 990-91.
78. See id. at 993-95. For a discussion of Chevron Oil, see supra note 73.
79. See id. at 994-95.
81. See Welch v. Cadre Capital, 946 F.2d 185, 188 (2d Cir. 1991).
83. This reaction was based primarily on the fact that Lampf shortened the limitations period in many jurisdictions, rejected equitable tolling principles, and applied retroactively to allow dismissal of pending cases. In contrast, the Court’s adoption of a uniform federal limitations period was a long-awaited development that was generally well-received. See, e.g., The Supreme Court, 1990 Term: Leading Cases, 105 Harv. L. Rev. 177, 400 (1991) (“Lampf brings a welcome end to the uncertainty and disparity among jurisdictions in setting limits to 10b-5 actions.”).
85. See generally Johnson, supra note 12, at 610 n.6 (describing effect of Lampf decision on pending cases and observing that “numerous pending cases” were dismissed).
To many litigants and a number of congressional representatives, these dismissals were unfair. This concern was exacerbated by the prevailing political climate. *Lampf* was decided during a period in which public opinion of the securities markets was at virtually an all-time low. Several scandals had recently rocked the country, including Ivan Boesky’s insider trading, the fraud at many savings and loan institutions, the BCCI fraud, and the disclosure of corruption in the junk bond market that led to the prosecution of Michael Milken. Many observers viewed the effect of the *Lampf*-generated dismissals as permitting the wrongdoers behind these frauds to escape responsibility for their actions.  

Congress immediately began considering a number of bills designed to overturn *Lampf*. Senator Bryan introduced one of the first, the Securities Investor Protection Act of 1991. The Bryan bill proposed amending the Exchange Act to require claims for securities fraud to be brought within the latter of two years from the date of discovery of the fraud or five years from the date of the fraud. Congressman Markey introduced a similar bill in the House, the Securities Investors Legal Rights Act of 1991. The Markey bill would have provided that a securities fraud suit was timely if filed within five years of the transaction or three years from when the fraud was discovered or should have been discovered, whichever came later.  

The proposed legislation was controversial. In legislative hearings, many testified in support of extending the statute of limitations. One proponent of a longer limitations period was Chairman Breeden of the SEC, who stated that the *Lampf* limitations period was “unrealistically short.” As support for this view, Chairman Breeden testified about the
importance of private securities fraud suits in the enforcement of the federal securities laws and observed that the Senate's two-and-five year period balanced the societal interests in prompt filings and finality of transactions against the door-closing effect of a limitations period.94

But there were signs that the Administration, which had indicated concern about excessive private securities litigation, did not concur with the Chairman’s position.95 Extending the statute of limitations would expand further an already problematically expansive area of litigation. Many in the securities industry had long been critical of the proliferation of strike suits, noting that most private securities fraud suits yield settlements in which the primary beneficiaries are the plaintiffs’ attorneys.96 Critics also warned that securities fraud lawsuits were crippling industry and innovation in order to benefit stock speculators and attorneys.97

The ultimate resolution was a political compromise98 spurred by the fact that many in Congress believed a quick solution was urgently necessary to address the retroactive effect of Lampf on pending cases before the rapidly-approaching end of the Fall 1991 term.99 The broad questions about whether it was appropriate to extend the statute of limitations for Rule 10b-5 claims, coupled with the Administration’s resistance to such an extension in the absence of other litigation reforms, made it unlikely that Congress could resolve these issues in time. Accordingly, Congress decided, in November 1991, to tack a provision reversing the retroactive effect of Lampf onto the omnibus federal banking bill.100 The bill, including this provision, was signed by President Bush on December 19, 1991.101

The provision, as enacted, did not provide a general statute of limi-

94. See id. at 14-15.
95. See, e.g., White House Says Lampf Proposal Must be Combined with Curbs on Litigation Abuses, 23 Sec. Reg. & L. Rep. (BNA) 1643 (1991) (reporting announcement by the administration that it opposed congressional efforts to extend the limitations period for private civil securities fraud suits unless Congress also enacted measures to curb meritless litigation).
96. See infra notes 167-70 and accompanying text.
99. See id. (describing reversal of retroactive aspect of Lampf as “urgently needed”).
100. Section 476 of S. 543, the omnibus banking reform bill, amended the 1934 Act by adding a new section, § 27A. The text of § 27A appears in note 102, infra.
101. The statute of limitations provision was enacted as § 476 of the Federal Deposit
tions for Rule 10b-5 claims. Instead, the statute amended the Securities Exchange Act of 1934 by adding a narrowly tailored provision, section 27A, addressed solely to the application of Lampf to pending cases. Briefly, section 27A provided that (1) claims filed prior to the date of the Lampf decision which were timely under the laws of the applicable jurisdiction, including principles of retroactivity, were to be considered timely filed; and (2) claims that had been dismissed based on Lampf could be reinstated within sixty days upon plaintiff's motion.

IV. THE LEGITIMACY OF SECTION 27A

A. The Application of the Statute

The adage "haste makes waste" seems aptly applied to section 27A. The enactment and application of this provision have already spilled an enormous quantity of judicial ink, as shell-shocked litigants and courts have attempted to assess both the legitimacy of the statute and its impact on pending cases—cases that are rapidly taking on an otherworldly aura as they are killed and revived by turns. Before examining the legitimacy of section 27A, however, a preliminary question is in order: What precisely did Congress do in adopting this statutory amendment?

As written, section 27A directs courts to determine whether a case

102. Section 27A of the 1934 Act reads as follows:

(a) Effect on pending causes of action

The limitation period for any private civil action implied under section 78j(b) of this title that was commenced on or before June 19, 1991, shall be the limitation period provided by the laws applicable in the jurisdiction, including principles of retroactivity, as such laws existed on June 19, 1991.

(b) Effect on dismissed causes of action

Any private civil action implied under section 78j(b) of this Title that was commenced on or before June 19, 1991—

(1) which was dismissed as time barred subsequent to June 19, 1991, and

(2) which would have been timely filed under the limitation period provided by the laws applicable in the jurisdiction, including principles of retroactivity, as such laws existed on June 19, 1991,

shall be reinstated on motion by the plaintiff not later than 60 days after December 19, 1991.

103. This part of the statute appears addressed to those circuits that had adopted the one-and-three-year limitations period but that had not yet determined whether to apply that period retroactively. See, e.g., Ceres Partners v. Gel Assoc., 918 F.2d 349, 364 (2d Cir. 1990) (leaving "for the future all questions concerning retroactive application"). Following James Beam, these courts began to apply the new limitations period retroactively. See Welch v. Cadre Capital, 946 F.2d 185 (2d Cir. 1991). By addressing § 27A to the retroactivity issue as well as to the underlying limitations period, Congress seemed to be precluding the application of James Beam to these pending cases, as well as Lampf. See Walsche v. First Investors Corp., 961 F.2d 649, 652 (2d Cir. 1992) (describing effect of § 27A as directing courts back to the case-specific retroactivity analysis of Chevron). A detailed discussion of the retroactivity issues raised by James Beam and § 27A is beyond the scope of this Article.

104. See Walsche, 961 F.2d at 652.
filed prior to June 19, 1991, was timely by applying the law as it existed as of that date, including principles of retroactivity. The statute does not explain, however, the manner in which a court is to choose what the limitations period was on June 19, 1991. Presumably, Congress intended courts to apply whatever rule had been used to determine the statute of limitations in the most recent circuit or district court case preceding Lampf.

As the foregoing discussion demonstrated, however, the status of limitations periods for 10b-5 claims prior to the Lampf decision was far from clear. The rules varied from circuit to circuit and even within circuits and were repeatedly subject to modification depending on the evolution of federal law, changes in the interpretation of state borrowing rules, and even changes to the underlying state limitations periods. In the absence of explicit congressional guidance, courts were acting in a quasi-legislative capacity in applying these rules; that is, they were developing federal common law.

What then was the true effect of the Supreme Court's decision in Lampf? There are various legal theories that describe the process by which courts develop the common law. Under the so-called declaratory theory, a court simply finds or declares "the rule that had always existed yet remained hidden from view." According to this theory, the Lampf Court did not make new law on June 20th, but instead simply found or declared existing law. If Lampf merely declared the law, however, rather than causing a rule to spring into being on June 20, 1991, what does it mean for Congress to turn the clock back to June 19th? Did the preexisting but undiscovered law not exist on that date as well?

The common law tradition has been particularly important in the development of private federal securities fraud claims. Although private Rule 10b-5 claims have a nominal statutory basis, the judiciary has been the exclusive author of the private cause of action. This process of lawmaking is fundamentally different from the ordinary legislative process. Among other distinctions, judicial lawmaking is evolutionary rather than revolutionary; a legal rule develops and gains general acceptance over time. During the course of this development, it may be impossible to specify precisely what the governing rule is.

105. See supra notes 10-15 and accompanying text.
107. See James B. Beam Distilling Co. v. Georgia, 111 S. Ct. 2439, 2451 (1991) (Scalia, J., concurring in the judgment) (judges in the common law tradition make law "as though they were 'finding it'—discerning what the law is, rather than decreeing what it is today changed to, or what it will tomorrow be"); see also TGX Corp. v. Simmons, 786 F. Supp. 587, 592 (E.D. La. 1992) ("The limitations period 'found' in Lampf thus did not represent a change in the law, but rather, a mere clarification [of] what the law has always been. Courts such as the Fifth Circuit, which had previously applied other limitations periods to section 10(b) claims, had thus done so in error.").
108. Presumably the rule existed prior to that date; otherwise the lower courts that anticipated Lampf would have been unable to find it.
The evolutionary process is complicated by the fact that judicial law-making does not require action by the United States Supreme Court. A legal issue can be addressed by lower courts and gain general acceptance as a "clear rule of law" many years before the Supreme Court recognizes its validity. Some issues may never be explicitly addressed by the Court.

The law governing the statute of limitations for securities fraud claims developed in precisely this way. The Supreme Court never expressly endorsed the old rule of borrowing from state law. To the extent that Supreme Court precedent establishes a rule of law, the only precedent squarely addressing the question of statute of limitations is Lampf, which holds that state borrowing is improper. Nor did the Court, in the years prior to Lampf, articulate a particular procedure for borrowing by, for example, explaining the principles to be used in determining which state statute was most closely analogous to the federal statute at issue. Thus, if the clear rule in 10b-5 claims was to borrow a limitations period from state law, that rule was adopted without affirmative Supreme Court action.

With this in mind, it is difficult to understand why the Supreme Court action in Lampf is the trigger that changes federal law. Even if borrowing the limitations period for Rule 10b-5 claims became the rule of law...
sometime during the forty years prior to Lampf, it would seem that the law began to change through the combination of Supreme Court decisions questioning the borrowing doctrine and lower court cases applying the new rules to 10b-5. If this is properly viewed as an evolutionary process, the Lampf decision represents only one step in that process.\textsuperscript{113}

All of this suggests that congressional intent in adopting section 27A extended beyond reversing Lampf. By directing courts to apply the law as it existed on June 19, 1991, Congress attempted not to change the law, but to freeze it for a particular class of cases. In other words, Congress is instructing the courts to ignore not just Lampf, but also Agency Holding,\textsuperscript{114} DelCostello,\textsuperscript{115} Data Access,\textsuperscript{116} Short,\textsuperscript{117} and all the cases casting doubt upon the continued vitality of state borrowing doctrine. Instead of selecting a rule of law for a 10b-5 statute of limitations, Congress is forbidding the application of a particular rule of law, that of a federal limitations period, in circuits that had not anticipated Lampf.\textsuperscript{118} This analysis raises another important question: Does Congress have the power to legislate in this manner?

\section*{B. The Constitutional Questions}

The unusual nature of Congress’ action in enacting section 27A immediately rendered the statute subject to challenge. Defendants who had lost the benefit of the Lampf limitations period through section 27A challenged the provision as unconstitutional\textsuperscript{119} under various theories including separation of powers, equal protection,\textsuperscript{120} and interference with

\begin{itemize}
\item \textsuperscript{113} It is not even clear that the Lampf decision was necessary to change the rule to that of a federal limitations period. The Supreme Court, after all, had declined to review the decisions in both Short and Data Access, even though both adopted the “new law” of borrowing a limitations period from federal law. In the absence of Supreme Court review, it is likely that the movement toward a uniform federal rule would have continued, with other circuits reconsidering their procedures through en banc proceedings or other means.
\item \textsuperscript{114} Agency Holding Corp. v. Malley-Duff & Assoc., Inc., 483 U.S. 143 (1987).
\item \textsuperscript{115} DelCostello v. International Bhd. of Teamsters, 462 U.S. 151 (1983).
\item \textsuperscript{116} In re Data Access Systems Securities Litigation, 843 F.2d 1537 (3d Cir.) (en banc), cert. denied, 488 U.S. 849 (1988).
\item \textsuperscript{117} Short v. Belleville Shoe Mfg. Co., 908 F.2d 1385 (7th Cir. 1990), cert. denied, 111 S. Ct. 2887 (1991).
\item \textsuperscript{118} See Henderson v. Scientific-Atlanta, Inc., 971 F.2d 1567, 1571 (11th Cir. 1992) (holding that § 27A prevented it from determining, on the basis of all the available law on June 19, 1991, that the one-and-three year rule of Lampf was the law in the Eleventh Circuit as of that date).
\item \textsuperscript{119} Dozens of district court decisions have evaluated the constitutionality of § 27A. Although the courts are split, the majority have upheld the statute against challenge. To date, only two circuit courts have addressed the issue, and both have found the statute constitutional. See Anixter v. Home-Stake Production Co., 977 F.2d 1533, 1547 (10th Cir. 1992); Henderson, 971 F.2d at 1573.
\item \textsuperscript{120} See Henderson, 971 F.2d at 1571, 1574. The Equal Protection Clause requires that similarly situated parties be treated the same under the law. Although defendants in securities fraud cases are not a suspect class, the legislature must have a rational basis for
The separation of powers argument focuses on the constitutional distinction between the role of Congress in adopting rules of law and the role of the courts in deciding cases in which an existing rule of law is interpreted and applied. In *United States v. Klein*, the Supreme Court held that a statute directing it to make a factual finding in a particular case was unconstitutional. The Court found that the statute "inadvertently passed the limit which separates the legislative from the judicial power" by "prescrib[ing] a rule for the decision of a case in a certain way" where "no new circumstances [had] been created by [the] legislation." The *Klein* doctrine provides that, although Congress can change both substantive and procedural law, it cannot prescribe a rule of decision in a case; that is, Congress cannot tell courts how to apply existing legal rules.

Because *Klein* was decided more than a century ago, and because few cases have involved application of the *Klein* doctrine, it is difficult to draw a bright line separating the legislative from the judicial power. In other words, precisely when is Congress attempting to determine the result in a litigation as opposed to prescribing a new rule of law? Through its decision in *Robertson v. Seattle Audubon Society*, the Supreme Court recently furnished some guidance. *Seattle Audubon* involved an applying a different rule of law to similarly situated defendants. This Article will not examine the equal protection challenge to § 27A.

121. Possibly the most troubling aspect of § 27A is subsection (b), which revives cases dismissed on the basis of *Lampf*. In *McCullough v. Virginia*, 172 U.S. 102 (1898), the Supreme Court held that the legislature lacks the power to take away rights that have been vested by final judgment. The Court based this conclusion both on principles of separation of powers and on the rationale that a final judgment is a form of property that cannot be taken away without due process. *See id.* at 123-24. Because subsection (b) allows cases to be reinstated upon motion of the plaintiff, whether or not a final judgment of dismissal has been entered and the time for appeal passed, it interferes with the defendant’s vested rights in the final judgment. *See, e.g.*, *Treiber v. Katz*, Fed. Sec. L. Rep. (CCI-) 97,203 (E.D. Mich. June 5, 1992) (upholding § 27A under *Klein* doctrine, but finding statute unconstitutional to the extent that it seeks to reinstate claims that have already been subject to final adjudication).

123. 80 U.S. 128 (1872).

124. *See id.* at 147-48. *Klein* involved a statute that directed courts to treat the fact that individuals had accepted presidential pardons as conclusive proof of their disloyalty for purposes of claims for compensation for property abandoned to federal troops during the Civil War. *See id.* at 142-43. Upon proof of the pardons, the courts were to dismiss summarily for want of jurisdiction. *See id.* at 143-44.

125. *Id.* at 147.

126. *Id.* at 146.

127. *Id.* at 147.

attack, under the *Klein* doctrine, on a statute regulating timber harvesting in Washington state.\(^\text{129}\) The Ninth Circuit had concluded that the statute violated the principles inherent in *Klein*.\(^\text{130}\) It held that although Congress could affect pending litigation, even deliberately, by amending or repealing a law, it could not dictate the outcome of a litigation where "no new circumstances have been created by legislation."\(^\text{131}\) The Ninth Circuit then interpreted the new statute as directing the court to reach a specific result rather than as establishing new law. Accordingly, it held that the statute violated *Klein*.\(^\text{132}\)

The Supreme Court reversed. The Court did not abandon the *Klein* doctrine but explained that the doctrine did not apply because the statute at issue in *Seattle Audubon* had in fact changed the underlying law.\(^\text{133}\) The Court interpreted the statute differently from the Ninth Circuit and found that it indirectly amended the environmental statutes in the pending litigation by providing alternative statutory criteria under which timber harvesting was legal.\(^\text{134}\) This was, according to the Court, the equivalent of amending the original statute, something that Congress clearly had the authority to do.\(^\text{135}\) Moreover, Congress was not directing the outcome of a litigation because it still remained for the court to decide whether the timber harvesting satisfied the criteria of the new legislation.\(^\text{136}\) Accordingly, the Court concluded that Congress had "compelled changes in law, not findings or results under old law."\(^\text{137}\)

By using the *Klein* criteria to evaluate the legality of the statute at issue in *Seattle Audubon*, the Supreme Court signalled that the *Klein* doctrine was still valid.\(^\text{138}\) Courts evaluating the validity of section 27A under the *Klein* doctrine have therefore asked whether section 27A changes the law of Rule 10b-5 statute of limitations.\(^\text{139}\) Presumably, \(129.\) *See id.* at 1410-12. The statute in *Seattle Audubon* was passed during pending environmental litigation regarding the harvesting of timber in Washington. *See id.* at 1410. The statute changed the criteria under which timber harvesting was legal not by amending the environmental law under which the litigation was pending, but by adding new methods of complying with the old statute. *See id.* at 1410-11. The statute also expressly referred to the pending litigation by caption and docket number and indicated that adherence to the statute's new criteria would be sufficient to satisfy the statutory requirements that were the basis of the litigation. *See id.* at 1411.

\(130.\) *See Seattle Audubon Soc'y v. Robertson*, 914 F.2d 1311, 1315 (9th Cir. 1990).

\(131.\) *Id.* (quoting United States v. Klein, 80 U.S. 128, 147 (1871)).

\(132.\) *See id.* at 1317.

\(134.\) *See id.*

\(135.\) *See id.* at 1414.

\(136.\) *See id.* at 1413-14.

\(137.\) *Id.* at 1413.

\(138.\) The Supreme Court also indicated the continued vitality of the *Klein* doctrine in United States v. Sioux Nation of Indians, 448 U.S. 371 (1980). Again the Court did not invalidate the statute in question but claimed that its holding was "consistent with the principles articulated in *Klein*." *Id.* at 402.

\(139.\) The question is whether Congress is changing the law or attempting to overturn a judicial interpretation of an unchanged law. For a recent case in which the court considered this question, see Johnston v. Cigna Corp., 789 F. Supp. 1098 (D. Colo. 1992).
Congress had the authority to adopt a statute of limitations different from that adopted by the Supreme Court in *Lampf*, and adoption of a new statute of limitations would constitute the necessary change of law to satisfy *Klein*.  

Section 27A does not, however, change the statute of limitations applicable to 10b-5 cases. Indeed, by enacting section 27A instead of the broader provisions that had been considered, Congress accepted the *Lampf* limitations period for all cases except those subject to section 27A. Congress therefore did not reverse *Lampf* by statute; it simply reversed the retroactive application of *Lampf*.

Many courts have concluded that section 27A nonetheless changes the applicable law. These courts have reasoned that Congress simply changed the statute of limitations, and hence the applicable law, for a small class of cases: those filed in a timely manner prior to *Lampf*. Thus, for example, the Tenth Circuit in *Anixter v. Home-Stake Production Co.*, explained that "in Section 27A, Congress prescribed a new statute of limitations for the judiciary to apply to all Section 10(b) litigation pending on June 19, 1991." The problem with this analysis is that Congress did not change the law even for this narrow class of cases. Congress did not, as the *Anixter* court states, prescribe a new statute of limitations at all. Congress simply rejected the retroactive application of *Lampf* to pending cases and, in so doing, returned the courts to their conflicting and confusing variety of pre-*Lampf* limitations periods.

It can be argued that section 27A is an example of a negative rather than an affirmative method of adopting a law. In other words, Congress' action in enacting section 27A can be described as the adoption of a new rule of law that is not a specific limitations period, but rather a rejection of the *Lampf* limitations period. Thus Congress, for the class of cases specified by section 27A, has adopted the rule of "not-*Lampf*." Again, however, this mischaracterizes the nature of the statute. Section 27A does not simply reverse *Lampf*; it "turns back the legal clock to the period just prior to *Lampf*."

Such a congressional action might be valid if the statute then allowed the courts "independently to adjudicate..."
any reopened actions on the basis of the law as they determine it then existed." Instead, however, the statute orders the judicial clock stopped as of June 19, 1991, preventing the courts from carrying out their judicial function of determining the appropriate statute of limitations in favor of wooden application of the pre-

Lampf rules. Thus in Henderson v. Scientific-Atlanta, Inc., defendant Scientific-Atlanta asked the court to adopt a one-and-three year limitations period, consistent with Lampf, based on the existing law on June 19, 1991. The court refused, stating that such action was foreclosed by section 27A.

Even if section 27A simply reversed Lampf, it would appear to violate separation of powers principles. As the Supreme Court has stated, "the essential purpose of the separation of powers is to allow for independent functioning of each coequal branch of government within its assigned sphere of responsibility, free from risk of control, interference, or intimidation by other branches." It is difficult to see how the Supreme Court could function as a coequal branch with Congress if Congress could simply, by statute, declare that "the decision of the U.S. Supreme Court in Lampf v. Gilbertson is hereby reversed." With respect to cases filed prior to June 19, 1991, that is the effect of section 27A.

---

145. Id.
146. 971 F.2d 1567 (11th Cir. 1992).
147. See id. at 1571 (citing Appellee's Brief at 16). The defendant argued that "[n]othing in Section [27A] precludes this Court from determining what the appropriate limitations period was for Section 10(b) in light of all the law that existed on June 19 and applying that law to plaintiffs." Id.
148. See id. It is as if Congress has said to the courts: "You have been deciding cases in which you develop the law of federal securities fraud under section 10(b) for the last 50 years. With respect to the issue of statute of limitations, you are prohibited from continuing that development within the statutorily-designated set of cases."
151. Alternatively, the statute can be read as changing the Lampf holding from retroactive to prospective. It does not seem as if such legislation constitutes the adoption of new law. See TGX Corp. v. Simmons, 786 F. Supp. 587, 592-94 (E.D. La. 1992) (holding that retroactive application of Lampf is constitutionally compelled, based on Court's
V. THE FUTURE OF THE RULE 10b-5 STATUTE OF LIMITATIONS

Whatever the answer to the foregoing constitutional debate, section 27A has raised a host of questions. Significantly, it is probably not the last congressional word on Rule 10b-5 statute of limitations. Several members of Congress have already expressed their intention to propose legislation lengthening the statute of limitations for securities fraud claims. In evaluating whether further legislation is desirable, several factors are worth further consideration.

First, in discussing the Lampf decision and limitations periods for securities fraud, Congress has given relatively little attention to the rationale behind limitations periods in general. Statutes of limitations serve a number of objectives in our litigation system. They encourage the prompt resolution of claims while evidence is fresh and witnesses are available. They protect putative defendants from having to defend against stale claims and provide repose after a period of time, so that potential defendants need not conduct their affairs indefinitely under a cloud of uncertainty. They protect the judicial system from overload by putting an end to the time when old cases can be brought in favor of preserving resources for fresher claims.

In addition to these general factors, there is a further rationale for statutes of limitations in securities cases: they reduce the ability of a potential plaintiff to speculate with a securities fraud claim. As Judge Easterbrook observed in Short: "Prices of securities are volatile. If suit may be postponed . . . then investors may gamble with other people's money." An investor can sit on a potential claim for years, waiting to see if the price of the securities involved goes up. If the price goes up, the investor sells. If the price goes down, the investor sues.

This possibility was precisely what caused Congress to adopt relatively

152. In addition, the decision and statute continue to raise questions of interpretation. For example, Lampf holds that the three year period of repose is not subject to principles of equitable estoppel or tolling. See Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilbertson, 111 S. Ct. 2773, 2782 (1991). Prior to Lampf, however, most courts had applied equitable estoppel to toll the borrowed statute of limitations. This equitable tolling doctrine appeared, for purposes of Rule 10b-5 actions, to be a matter of federal rather than state law. Presumably then, it was not part of the statute of limitations that courts borrowed from state law. Was the tolling doctrine then revived by § 27A, or does that aspect of Lampf survive?

153. See S. 3181, 102d Cong., 2d Sess., at § 36 (1992) (containing a general statute of limitations requiring all private rights of action, except as provided elsewhere in the statute, to be filed not later than two years of when the fraud is discovered or should have been discovered or five years from the date of the fraud, whichever is earlier).

155. Id. at 1392.
short limitations periods\textsuperscript{156} for the express private rights of action under the federal securities laws.\textsuperscript{157} Congress recognized that the federal securities laws were atypical in the possibility they offered for opportunistic claims\textsuperscript{158} and drafted the statutes of limitations accordingly.\textsuperscript{159} The current Congress should not let a few highly publicized frauds blind it to this concern.

Further attention should also be devoted to the structure of any proposed statute of limitations. The legislation introduced immediately after \textit{Lampf}\textsuperscript{160} included the same dual period structure as the statute of limitations adopted in \textit{Lampf}, but both the House and Senate bills would have allowed plaintiffs to bring suits within a specified period following discovery of the fraud, even after the expiration of the longer statutory window.\textsuperscript{161} This meant that the discovery provision would permit suits as timely even if they were filed more than five years after the date of the fraud, leaving no absolute outside limit or period of repose for securities fraud claims.

In addition, the proposed statutes described the discovery provision of the statute of limitations in terms of "reasonable diligence."\textsuperscript{162} That is, the proposed legislation provided for the discovery provision to run from the date that the fraud was discovered or should have been discovered through the exercise of reasonable diligence. Although some statutes of limitations in the federal securities laws incorporate this approach,\textsuperscript{163} the limitations period adopted by the Supreme Court in \textit{Lampf} did not; the start of the one year time frame was predicated on actual discovery of the

\item See, e.g., 78 Cong. Rec. 8199 (1934) (statement of Sen. Kean) (describing opportunity of investor to speculate with fraud claim: "[The investor] might say to himself, 'I have something that I can sue on if these bonds go down. If they go up I will not want to sue because I will get a profit on them, but should they go down, then I have the option of suing.'").
\item See, e.g., 78 Cong. Rec. 8198 (1934) (statement of Sen. Fletcher): [T]he thought was that a man ought not to delay suit more than 1 year after he discovers the fraud. If he has been injured and finds that he has been injured, he ought to bring his action within a reasonable time, and we fix that time at 1 year.
\item See 78 Cong. Rec. 8594 (1934) (statement of Sen. Logan) ("[A]s time passes someone reaches the conclusion he has lost money in gambling on the stock market, because generally that is what it is, and he will go back to find out whether there was anything omitted in the statement.").
\item See 78 Cong. Rec. 8201 (1934) (statement of Sen. Barkley) ("I think we have to consider this proposed statute of limitations in a little different light from that in which we consider ordinary statutes of limitations.").
\item Two major legislative proposals, the Bryan bill and the Markey bill, are discussed supra in the text accompanying notes 87-94.
\item See Bryan bill, supra note 87, § 36; Markey bill, supra note 89, § 36. Thus both proposed acts would have allowed suits to be filed within the latter of the two or three year discovery period or the five year straight limitations period.
\item See Bryan bill, supra note 87, § 36; Markey bill, supra note 89, § 36.
\item See, for example, § 13 of the Securities Act of 1933, which provides for a period running for "one year after the discovery . . . or after such discovery should have been made by the exercise of reasonable diligence. . . ." 15 U.S.C. § 77m (1988).
\end{enumerate}
\end{footnotesize}
Chairman Breeden warned Congress in his comments on the proposed legislation that a "reasonable diligence" approach provides less clarity because of the difficulty in ascertaining whether a plaintiff should have discovered a fraud earlier than he or she actually did. As Chairman Breeden observed, "this requirement would prompt a considerable amount of needless litigation to resolve subtle shadings of what an investor could or might have done."

Finally, the debate about statute of limitations is, in part, a microcosm of the larger debate about the efficacy of securities fraud litigation. Studies have shown that securities fraud litigation is peculiarly subject to abuse. For example, a recent study published by Professor Janet Alexander in the Stanford Law Review found that a majority of the securities fraud class actions studied settled at roughly twenty-five percent of the amount at stake, seemingly without regard to their relative merit. The study also concluded that the primary beneficiaries in these cases appear to be lawyers, not individual stockholders. A study conducted by the Law and Economics Consulting Group examined 330 cases brought since 1988 and found similar results. Congressional concern over this situation has prompted several legislative proposals to overhaul the litigation of securities fraud cases, the nature of the cause of action, or

164. See Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilbertson, 111 S. Ct. 2773, 2782 (1991). It is not clear that either the Court or Congress has focused on the distinction between the two standards. See id. at 2782 n.9 (acknowledging, as SEC observed, that terminology of the one- and three-year periods differed slightly in different sections, and selecting, without analysis, the language of § 9(e) of the 1934 Act, "[t]o the extent that these distinctions in the future might prove significant . . .").

166. Breeden Letter, supra note 165, at S12,604.

168. See id. at 517. The study constructed a sample of lawsuits and determined the amount at stake by calculating the amount of stock price movement and the number of shares affected by the lawsuit. See id. at 515-17.

169. See id. at 574-76. Professor Alexander calculated that plaintiffs' attorneys fees and expenses averaged over 25% of the recovery in her sampling of settled cases and estimated that total costs of litigation, involving costs and attorneys fees, "are probably about equal to the amount distributed to the class." Id. at 573.

170. See Vincent E. O'Brien, The Class Action Shakedown Racket, Wall St. J., Sept. 10, 1991, reprinted in 137 Cong. Rec. at S17,357 (daily ed. Nov. 21, 1991) (finding that 96% of securities fraud cases were settled; average attorneys' awards were about $1 million in fees and $250,000 in expenses or 21% of the average settlement amount; settlements resulted in less than a nickel in compensation for each dollar lost by investors); see also William Tucker, Shakedown?, Forbes, August 19, 1991, at 98 (securities fraud class actions become a "kind of tax on American businesses").
both.\textsuperscript{171} If Congress, after fifty years, is finally ready to pay some real attention to the court-created doctrine of federal securities fraud, it would be ironic for its efforts to be limited to section 27A.

\textsuperscript{171} See, e.g., 138 Cong. Rec. S12,599 (daily ed. Aug. 12, 1992) (introduction by Sen. Domenici of the Securities Private Enforcement Act of 1992, S. 3181, describing it as a "bill to establish a filing deadline and to provide certain safeguards to curb frivolous and other cases not substantially justified which are brought under the Securities and Exchange Act's implied private action provisions"); H.R. 417 (introduced by Rep. Tauzin, Jan. 5, 1993, and described in 25 Sec. Reg. & L. Rep. (BNA) No. 2 at 43-44 (Jan. 15, 1993)) (proposing to reform securities fraud litigation and to extend the statute of limitations to one and five years); see also Alexander, \textit{supra} note 167, at 581-96 (discussing possible changes in litigation system to establish a greater link between the merits and the outcome in settled cases).
